

TransitOps

Role Dashboards: KPIs, Functions, Permissions & Pages

This document consolidates the dashboard design for TransitOps' four user roles — Fleet Manager, Driver, Safety Officer, and Financial Analyst. It covers the key KPIs each role needs, the functions/permissions each role can perform, a consolidated permission matrix, and the recommended page/screen list per role. Items are tagged **[Doc]** where they come directly from the TransitOps hackathon brief, and **[Industry]** where they are common practice additions from fleet management software beyond what the brief specifies.

1. Key KPIs per Role

Ranked by importance to that role's day-to-day job, most important first.

1.1 Fleet Manager — owns fleet health and asset efficiency

- 1 Fleet Utilization % **[Doc]** — the single number that summarizes whether the fleet is sized right
- 2 Vehicle status breakdown — Active / Available / In Maintenance / Retired counts **[Doc]**
- 3 Vehicles currently in maintenance with expected return date **[Doc][Industry]**
- 4 Upcoming preventive maintenance schedule (due by mileage or date) **[Industry]**
- 5 Idle vehicle alert — vehicles Available but unused for X days **[Industry]**
- 6 Filters by vehicle type / status / region **[Doc]**
- 7 Vehicle document expiry tracker (insurance, registration, permits) **[Industry]**
- 8 Average vehicle age / odometer vs depreciation curve **[Industry]**

1.2 Driver — operational, single-trip focus

- 1 My current/active trip — status, destination, cargo weight **[Doc]**
- 2 Create new trip form with live validation (capacity check, driver/vehicle availability) **[Doc]**
- 3 My assigned vehicle status **[Doc]**
- 4 Pending/queued trips waiting to be dispatched **[Doc]**
- 5 Trip completion form — final odometer + fuel consumed **[Doc]**
- 6 My license validity status — days to expiry, blocks trip creation if expired **[Doc]**
- 7 My trip history **[Doc]**
- 8 My safety score (read-only, motivational) **[Industry]**
- 9 Route/ETA view **[Industry]**
- 10 Notifications (new trip assigned, vehicle pulled for maintenance) **[Industry]**

1.3 Safety Officer — compliance-first

- 1 Expired / expiring licenses list (next 30/60/90 days) **[Doc]**
- 2 Suspended drivers and reason/duration **[Doc]**
- 3 Compliance rate % — % of active drivers with valid, non-expired licenses **[Industry]**
- 4 Safety score distribution / leaderboard — flag drivers trending downward **[Doc]**
- 5 Incident/violation log (accidents, traffic tickets) **[Industry]**
- 6 License renewal forecast (calendar view) **[Industry]**
- 7 Driver behavior signals — harsh braking, speeding, if telematics available **[Industry]**
- 8 Cross-check: vehicles In Shop overdue for return **[Industry]**

1.4 Financial Analyst — profitability-first

- 1 Net profit vs total expenses — Revenue – (Fuel + Maintenance + Other Expenses) **[Doc]**
- 2 Vehicle ROI ranking — best/worst performers using the doc's ROI formula **[Doc]**

- 3 Operational cost breakdown — Fuel vs Maintenance vs Other, as a share of total **[Doc]**
- 4 Fuel efficiency (distance/fuel) per vehicle, with outlier flags **[Doc]**
- 5 Cost per km / cost per trip **[Industry]**
- 6 Fleet utilization % viewed as a cost-efficiency signal **[Doc]**
- 7 Revenue by route/region **[Industry]**
- 8 Expense trend over time (tolls/fines rising?) **[Industry]**
- 9 CSV/PDF export **[Doc]**
- 10 Budget vs actual (stretch) **[Industry]**

2. Functions Each Role Can Perform

Trip creation/dispatch is assigned primarily to the Fleet Manager rather than the Driver. In real fleet operations drivers are typically out driving, not planning dispatch, and dispatching requires cross-checking vehicle and driver availability — a planning function. The Driver role is scoped to execution actions instead.

2.1 Fleet Manager — primary trip owner + asset owner

- 1 Create / dispatch trips — select source, destination, vehicle, driver, cargo weight, distance **[Industry]**
- 2 Reassign or reroute an active trip (swap vehicle/driver mid-flow) **[Industry]**
- 3 Register / edit / retire vehicles (CRUD on Vehicle Registry) **[Doc]**
- 4 Create and close maintenance records — triggers In Shop / Available transitions **[Doc]**
- 5 Cancel a dispatched trip — restores vehicle/driver to Available **[Doc]**
- 6 View fleet-wide dashboard (utilization, KPIs, filters) **[Doc]**
- 7 Approve/override a trip that fails soft validation **[Industry]**
- 8 View driver roster and availability (read-only) **[Doc]**
- 9 Manage vehicle documents (insurance, permits, expiry) **[Industry]**

2.2 Driver — execution-only, mobile-first

- 1 View my assigned trip(s) — current + upcoming **[Doc]**
- 2 Update trip status — mark Dispatched trip as en route / delayed **[Industry]**
- 3 Complete a trip — enter final odometer + fuel consumed **[Doc]**
- 4 Log fuel purchase during a trip **[Doc]**
- 5 View my vehicle's condition/status **[Doc]**
- 6 View my own profile — license expiry, safety score (read-only) **[Doc]**
- 7 Request trip cancellation (sent to Fleet Manager for approval) **[Industry]**
- 8 Optional: self-dispatch a trip, as a toggleable permission not on by default **[Doc]**

2.3 Safety Officer — compliance actions

- 1 Suspend / reinstate a driver — sets status to Suspended, blocks trip assignment **[Doc]**
- 2 Edit driver license data — number, category, expiry date **[Doc]**
- 3 View expiring/expired license report **[Doc]**
- 4 Update driver safety score (manual entry or telematics import) **[Doc]**
- 5 Log a safety incident/violation against a driver **[Industry]**
- 6 View trip history for a flagged driver (read-only) **[Doc]**
- 7 Cannot create/dispatch/cancel trips or edit vehicles — kept out of dispatch to avoid conflict of interest with safety authority **[Industry]**

2.4 Financial Analyst — read + report, no operational writes

- 1 View cost/profit dashboard (net profit, ROI, cost breakdown) **[Doc]**

- 2 Log non-fuel expenses (tolls, fines) against a vehicle or trip **[Doc]**
- 3 Export reports (CSV, PDF) **[Doc]**
- 4 View fuel logs and maintenance costs (read-only) **[Doc]**
- 5 Set/edit acquisition cost for ROI calculation **[Doc]**
- 6 Cannot create trips, edit vehicle/driver status, or touch dispatch — pure financial layer **[Industry]**

3. Permission Matrix

Who can perform each action across the four roles.

Action	Fleet Manager	Driver	Safety Officer	Financial Analyst
Create / dispatch trip	Yes	Request only	No	No
Complete / cancel trip	Yes	Complete only	No	No
Edit vehicle registry	Yes	No	No	No
Create maintenance log	Yes	No	No	No
Suspend driver	No	No	Yes	No
Edit license data	No	No	Yes	No
Log fuel	Yes	Yes (own trip)	No	No
Log other expenses	Yes	No	No	Yes
Log trip revenue	Yes	No	No	Yes
View financial dashboard	View only	No	No	Full
View compliance dashboard	No	No	Full	No
Export reports	Yes	No	Safety reports	Financial reports

Note: Safety Officer is intentionally excluded from dispatch/vehicle actions to avoid a conflict of interest between grading driver safety and deciding who drives. Financial Analyst is read-only on operational data and write-only on cost/revenue entries.

4. Pages / Screens per Role

Ordered by centrality to the role's daily workflow. 19 screens total, plus shared/global pages.

4.1 Fleet Manager — 6 pages

- 1 Dashboard — Active/Available/In Maintenance vehicle counts, Active/Pending trips, Drivers On Duty, Fleet Utilization %; filters by vehicle type/status/region [\[Doc\]](#)
- 2 Trip Management (create + monitor) — dispatch form (vehicle picker limited to Available, driver picker limited to Available + valid license, cargo weight validated against capacity), plus a live board of Draft/Dispatched/Completed/Cancelled trips with reassign/cancel actions [\[Doc\]](#)
- 3 Vehicle Registry — CRUD table: reg. number, model, type, capacity, odometer, acquisition cost, status [\[Doc\]](#)
- 4 Maintenance Log — create/close maintenance records per vehicle; closing auto-restores status unless Retired [\[Doc\]](#)
- 5 Vehicle Documents — insurance/permit/registration expiry tracker [\[Industry\]](#)
- 6 Driver Roster (read-only) — availability view used when assigning trips [\[Doc\]](#)

4.2 Driver — 4 pages

- 1 My Trips — current/active trip card + upcoming queue; primary landing screen [\[Doc\]](#)
- 2 Trip Execution — status update (en route/delayed), mid-trip fuel log entry, completion form (final odometer + fuel consumed) [\[Doc\]](#)
- 3 My Vehicle — assigned vehicle's condition/status, read-only [\[Doc\]](#)
- 4 My Profile — license number/category/expiry, safety score, contact info; read-only except contact number [\[Doc\]](#)

4.3 Safety Officer — 4 pages

- 1 Compliance Dashboard — expiring/expired license list (30/60/90-day buckets), compliance rate %, suspended drivers [\[Doc\]](#)
- 2 Driver Directory — full driver list with edit access to license data and Suspend/Reinstate action [\[Doc\]](#)
- 3 Safety Scores — score list/leaderboard, manual score entry or telematics import [\[Doc\]](#)
- 4 Incident Log — record and view violations/accidents per driver [\[Industry\]](#)

4.4 Financial Analyst — 5 pages

- 1 Financial Dashboard — net profit vs expenses, ROI ranking, cost breakdown (Fuel/Maintenance/Other), fuel efficiency, cost per km [\[Doc\]](#)
- 2 Trip Revenue & Cost — per-trip revenue entry and computed trip cost/profit [\[Doc\]](#)
- 3 Fuel & Expense Logs (read/write) — view fuel logs, log non-fuel expenses (tolls, fines) [\[Doc\]](#)
- 4 Maintenance Costs (read-only) — cost view into maintenance records, no edit [\[Doc\]](#)
- 5 Reports & Export — CSV/PDF export of any of the above [\[Doc\]](#)

4.5 Shared / Global Pages

- 1 Login — email/password authentication, redirects by role [\[Doc\]](#)

2 Access Denied / 403 — shown when RBAC blocks a role from a route [\[Doc\]](#)
